selection and bayesian methodology for improved econometric analyses

harvard university has been and continues to be one of the most important global centres for economics with three chapters on themes in harvard economics and 41 chapters on the lives and work of harvard economists these two volumes show how economics became established at the university how it produced some of the world's best known economists including joseph schumpeter wassily leontief and john kenneth galbraith and how it remains a global force for the very best in teaching and research in economics with original contributions from a stellar cast the volumes provide economists especially those interested in macroeconomics and the history of economic thought with an in depth analysis of harvard economics

the original research papers collected in this volume continue the development of discrete choice analysis of related structural models for analysis of choice behavior and of the statistical theory used in inference on these models most papers in the volume are revised versions of ones presented at a 2005 conference in honor of daniel l mcfadden whose fundamental research made discrete choice analysis part of the fabric of modern economics

illustrates the progress that has been made in financial markets and assesses innovations that provide solutions to dilemmas and increase efficiency these articles break down the complex web of relationships between the financial intermediary the managers of corporations shareholders creditors analysts and regulators

the recent widespread availability of intraday tick by tick databases for stocks options and currencies has had an important impact on research in applied financial econometrics and market microstructure econometric modelling of stock market intraday activity focuses on the econometric modelling of intraday tick by tick transaction data trades and quote for stock traded on the new york stock exchange nyse recent quantitative modelling tools such as intraday duration models and garch modes are presented a survey of trading mechanisms in financial markets and a review of market microstructure issues is also included which allows to gain a better understanding of the motivation underlying the use of the quantitative models in the empirical applications the link is made with the models of the market microstructure literature that have proposed an explicit treatment of time in the trading process other empirical applications deal with the modelling of intraday volatility and intraday value at risk although the models are applied to data for stock traded on the nyse they are not specific to this exchange and could be used to analyze other existing trading mechanisms accordingly this book should be of interest to academics and graduate students involved in empirical finance and applied econometrics regulators working for exchanges and practitioners in banks or brokerage firms

issues for feb 1965 aug 1967 include bulletin of the institute of management sciences

the speed with which business has become globally integrated is impressive and almost frightening much of this change has come from the pacific basin at the same time however the taiwanese chinese and southeast asians have also suffered from these rapid changes the paranoia associated with rapidly escalating rates of foreign investment in china by a small country like taiwan for example may provide an index of the anxiety that such change can engender the studies in this collection of research articles provide a considered rational approach to some of these changing

patterns of world business economic growth regional trade foreign direct investment capital markets and trade restrictions the patterns of changing interlocking global business systems revealed in these articles are fascinating and reassuring it is interesting and enlightening to see how these asian business systems interlock where the parallel political systems may be in conflict
