this book discusses to what extent the precautionary approach to fisheries management is reflected in the msc fisheries standard and in the certification of four clusters of fisheries in polar waters certification according to private sustainability standards ecolabelling has become an important addition to public fisheries management in recent years the major global ecolabel in terms of comprehensiveness and coverage is the marine stewardship council msc fisheries standard becoming and remaining certified requires continuous behavioural adaptation from fisheries through a fine meshed system of improvement conditions attached

to certification focus is on how certification has influenced fisher behaviour and state practice in the southern ocean krill and toothfish fisheries msc certification has generated new scientific knowledge about the stocks in the barents sea cod and haddock fisheries fishing companies have voluntarily adapted their behaviour to reduce the fishery s impacts on endangered threatened and protected species and bottom habitats in the local lumpfish fisheries in greenland iceland and norway measures have been introduced to reduce the effects on seabirds and marine mammals in the northeast atlantic mackerel fisheries impacts have been more modest private certification is no panacea but it seems to have found a niche as a supplement to national legislation and international agreements

one key aspect of quality management is the growing interest in bs 5750 and the linked international standard iso 9000 businesses face a number of problems in seeking bs 5750 accreditation and the formal approach to business operation required by bs 5750 can be a difficult hurdle to clear but as a bonus offers considerable management benefits beyond making the company an acceptable supplier
